

ALUCA

EASE YOUR WORK

PREMIUM VEHICLE RACKING SYSTEMS

ALUCA was invented to make life easier for tradespeople. Being on the road with ALUCA doesn't just mean getting tools safely from A to B.

It is based on a commitment to making organisation easy and optimising customised vehicle racking systems in every respect. In other words, questioning existing solutions and responding with innovative products and services. The thousands of bespoke lightweight solutions and the feedback received from our customers, for example, have changed the way we build new standard systems.

The idea of focusing on the essentials with aluminium, while simultaneously delivering durability and organisation, has become established practice in the commercial vehicles sector. It's all about transforming the space available into the perfect mobile workplace.

Welcome to a better working world.

SIMPLE.

Hit the ground running. Use space effectively. Make a professional impression. Save time and money. We transform customer requests into customer understanding. Our mission is to develop and manufacture the lightest and most efficient organisational systems on the market. Ultimately, we always find the perfect fit.

STREAMLINED.

Anyone can promise quality. But we are not satisfied until everything is lean, nothing is wasted and all our resources have been used to their full potential. That is why our processes are geared towards speed and efficiency. It is also why we never stop asking ourselves whether anything else can be dispensed with or wondering where else we can save another gram in weight. It's what we call 'Ease your work'.

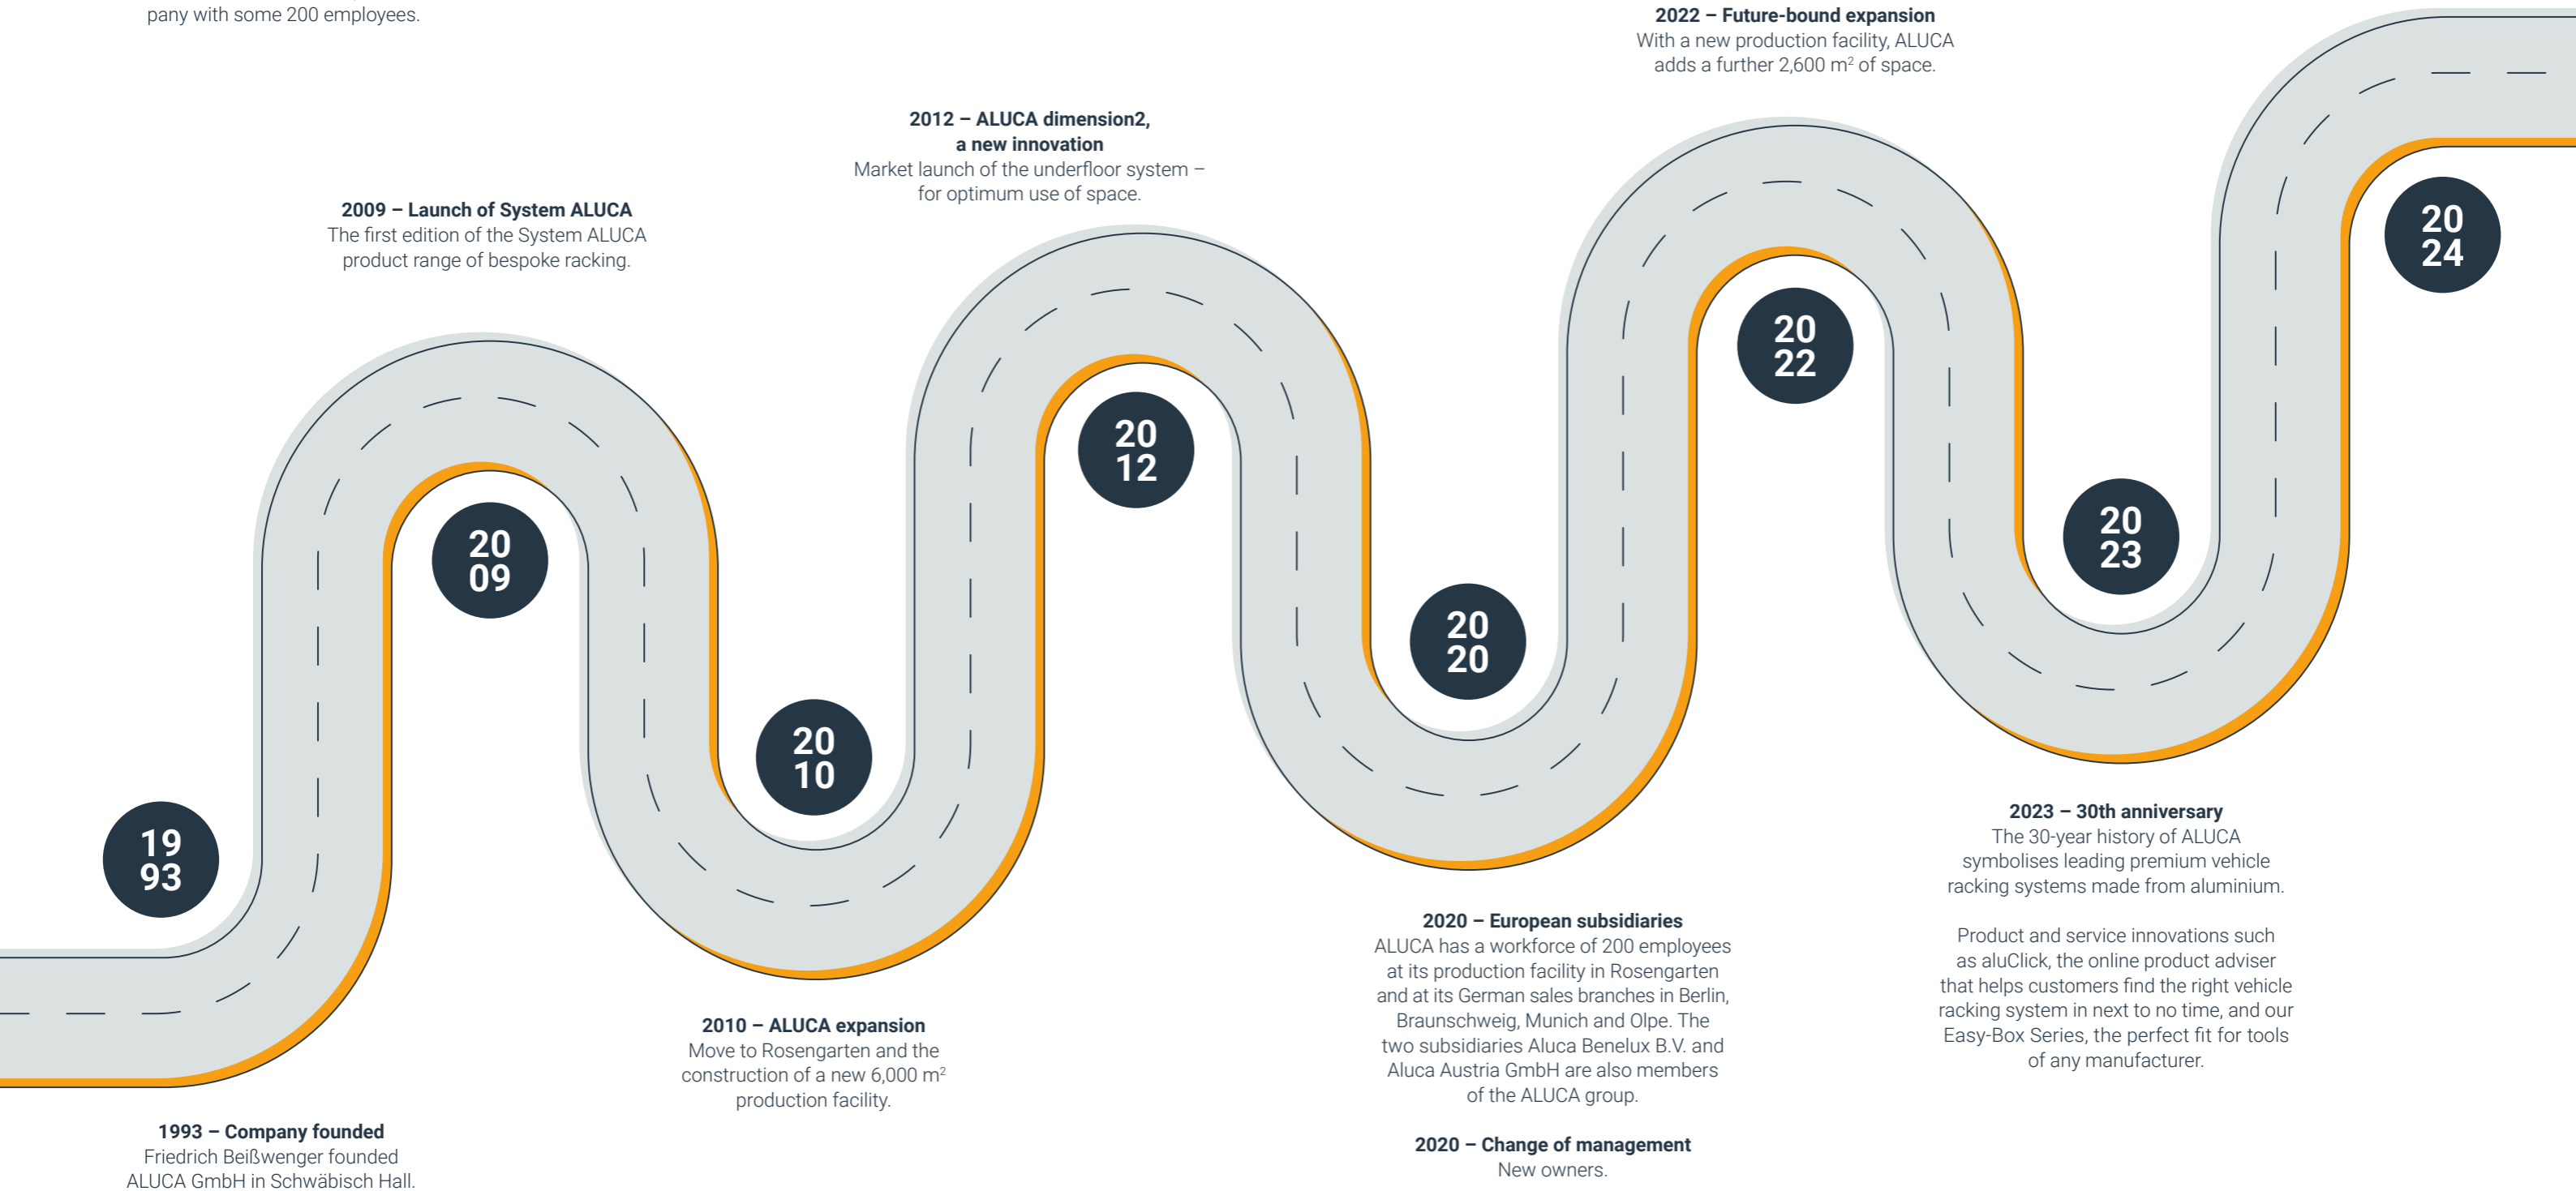

SOLUTIONS.

We just love to get things done – ideally on an equal footing with our strategic partners, customers and colleagues. ALUCA is a company with a superb tradition of innovation and an established market player in the commercial vehicles sector. Boasting more than 30 years of knowledge and skill, we put our entire passion for aluminium into each and every product and system.

Our Story. Built to last.

Driven by a passion for aluminium and a knowledge of systems, we have grown over the years from a small workshop to a global company with some 200 employees.

7200

light commercial vehicles fitted in 2022

8

year warranty, because we believe in the quality of our products and services

20

export countries

>100,000

racking systems sold

30

years of experience

5

1993

The year the company was founded in Schwäbisch Hall

2

group subsidiaries in Benelux and Austria

>60

60 partners and importers across Europe

14001

For us, ISO environmental management certification is more than just certification.

>200

dedicated employees

1

batch size available as a custom solution for all customers

LOAD SECURING

Various components and mounting systems for load securing and loading compartment protection – from lashing rails and safety nets through to fixing straps. Compliant with standards and regulations and in excellent ALUCA quality.

ACCESSORIES AND MUCH MORE

Some 1,000 items connected with vehicle racking systems that make everyday working life easier. From roof and ladder racks and Zeliox power supply equipment for an independent power source through to highly functional floor and side wall panelling for optimum organisation and protection.

FLEET SOLUTIONS FOR COMPANIES

A full-service range under one roof for companies with vehicle fleets: a comprehensive, hassle-free package that starts with identifying needs and comprises the coordination of all services including installation, approval and transfer.

OEM SOLUTIONS

Prefabricated racking packages for compact, medium-sized and large vans – and for all common vehicle makes.

LEASING

Whether just the vehicle racking system or an all-round package including a vehicle – our partner network will find the ideal financing model for our customers.

CUSTOM SOLUTIONS

Even highly specialised requirements are met with bespoke solutions: on request, we will develop customised products in batch size 1, whether for police or fire service vehicles or a rally expedition.

Vision

ZERO

Waste

‘Some people see a glass that is half full. We see a glass that is twice the size it needs to be.’

For ALUCA, the metaphor of the half-full/half-empty glass offers a unique take on things – one based on sustainability. Our lean approach is a quest to eliminate the superfluous and, for example, minimise the use of material.

Perfection is the elimination of waste.

NOT HEAVY. BUT METAL.

It is **LIGHTWEIGHT**, it is **DURABLE**, it is **SHAPE-RETENTIVE**, it is **CORROSION-RESISTANT**, it is an **INNOVATIVE MATERIAL**, it is **LOW-MAINTENANCE**, it is **EASY TO PROCESS**, it is **EASY-CARE**, it is perfect for maximising **PAYLOAD**, it is **RECYCLABLE**, it is highly **MACHINABLE** and **TORSION-FRIENDLY**, it is **FASCINATING**, it is **AMAZING**

Aluminium is our passion.

Acting for tomorrow. Now.

For us, sustainability is more than a fancy buzzword. As a progressive company and a passionate player in an evolving world of work, ALUCA is fully committed to a lean culture in everything it does. We have the vision and the aspiration to perfectly understand the value creation process of our customers and to optimise their workflows with our innovative solutions, making it easier for them to achieve their goals.

How?

WITH STRATEGIC PARTNERS

We are proud of our partner network and genuine spirit of partnership. In tandem with our suppliers and supplementary product providers, as well as our international ALUCA partners, independent specialist retailers and installers, we are helping to build a better working world.

AS AN EMPLOYER

We are committed to a positive working atmosphere and respectful dealings, with our employees at the forefront. Here at ALUCA, we foster personal development and support people in identifying and fully harnessing their individual skills and abilities. 'Ease your work' stands for a bright future and working in a state-of-the-art environment – and thanks to our global presence, we also offer exciting international opportunities.

BY TAKING RESPONSIBILITY FOR THE ENVIRONMENT

We handle our resources with respect and, paying due regard to current and future challenges, manufacture excellent products that embody durability, recyclability, zero waste and, ultimately, sustainability.
